Career Overview

I spent six years in the Michigan National Guard as an IT Specialist and six years at CompRenew. I have primarily focused on networking with additional experience with Windows, Linux, and some MacOS in desktops and servers.

My professional experience is supplemented by personal projects in my home lab and with cloud service providers. I run several virtual servers, including this website, on a virtualization server at home. Among the servers are game servers for friends, a blog, reverse proxy, and a few others.

Objective

- I am seeking to expand my IT experience and further my education in the IT field.

Experience

IT SPECIALIST | MICHIGAN NATIONAL GUARD A156 | FEBRUARY 2016 – FEBRUARY 2021

My primary duty was the deployment of Command Post Nodes (CPN). This task included Driving with a trailer, running cabling, and configuring the network equipment that was part of the node.
Tasks:

- Drive with trailers
- Deploy network equipment in remote environments
- Cross train with satellite terminal technicians

IT REFURB TECHNICIAN | COMPRENEW | OCTOBER 2016 – OCTOBER 2017

My primary job was to refurbish desktop computers from residential and corporate recycling programs.
Tasks:

- Configure desktop computers with standardized hardware specifications
- Install Windows and Linux along with drivers and updates
- Run burn in tests

NETWORKING REFURB TECHNICIAN | COMPRENEW | OCTOBER 2017 – JUNE 2023

I started a department for testing network equipment I have written work instructions for my most common tasks.
Tasks:

- Configure network equipment
- Test functionality of the devices
- Write documentation and procedures for testing network equipment
